

## **Graham J. Hutchings**

*Graham Hutchings is the Director of the Cardiff Catalysis Institute and Pro Vice-Chancellor Research at Cardiff University. His early career was spent in industry, initially in ICI at Teeside, and then in AECL, South Africa, where he made his discoveries concerning catalysis with gold working on acetylene hydrochlorination. He moved to academia in 1984, and he has been mainly interested in the discovery of catalysts for redox reactions. He has previously held chairs of chemistry in the University of Witwatersrand and the University of Liverpool.*
